PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 8+ years of enterprise application and frontend development experience, including 8 years of hands-on Amazon Web Services (AWS) experience. Builds frontends in React, Next.js, and Angular with TypeScript, and backends in Node.js, C#, .NET 6/8, and ASP.NET Core, delivering scalable, secure production platforms for government, fintech, and cybersecurity clients. Rearchitected a monolithic frontend into micro frontends with Module Federation, cutting release cycle time by about 40%, and designed .NET domain layers with Entity Framework Core, DDD, and CQRS. **Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103)**, building generative and agentic AI solutions on Microsoft Foundry. Leads code reviews and mentors engineers in Agile/Scrum teams; five years fully remote with US, UK, and German teams.

SKILLS

Frontend (Front-End Web Development): React 18 (React.js), Next.js 14 (App Router), Angular, TypeScript, JavaScript (ES6+), RxJS, State Management (Redux, Redux Toolkit, NgRx, Zustand, React Query / TanStack Query), React Router, React Hooks, Single-Page Applications (SPA), SSR / SSG / ISR, React Server Components, HTML5, CSS3

Backend & APIs: C#, .NET 6, .NET 8, .NET Core, ASP.NET Core Web APIs, Node.js, Express.js, Blazor Server, Entity Framework Core, REST / RESTful APIs, API Design (OpenAPI / Swagger), GraphQL, WebSockets, SignalR, Webhooks, Microservices, Message Queues (Kafka, RabbitMQ), Full-Stack Development (Full Stack), PHP Integration, Python

Architecture & Performance: System Design, Distributed Systems, Cloud-Native Applications, Scalable Micro-Frontend Architecture (Microfrontends: single-spa, Webpack Module Federation 2), Component Architecture, Monorepos (Nx, Turborepo), Design Systems, OOP, SOLID, Design Patterns, Clean, Maintainable Code, Domain-Driven Design, CQRS, Clean Architecture, Database Design and Data Modeling (Schema Design), Code Splitting, Lazy Loading, Virtualization, Memoization, Frontend / Web Performance Optimization, Core Web Vitals (LCP, INP, CLS), Web Vitals Monitoring (web-vitals, Lighthouse CI), Application Security: Authentication and Authorization (OAuth 2.0 / JWT / SSO, RBAC)

Databases: SQL, Microsoft SQL Server (T-SQL, Stored Procedures), PostgreSQL, MySQL, NoSQL (MongoDB), Redis (Caching), Prisma ORM

Cloud & DevOps: Amazon Web Services (AWS, 8 years), EC2, S3, Lambda, Microsoft Azure (Azure App Service, Azure Functions, Azure OpenAI, Microsoft Foundry), Azure DevOps, Jenkins, CI/CD (Continuous Integration / Continuous Deployment), GitHub Actions, GitLab CI/CD, Containerization (Docker, Kubernetes), Terraform (Infrastructure as Code), Google Cloud Platform, Vite, Webpack, Git / GitFlow

UI, Mobile & Accessibility: Tailwind CSS, Material UI, Ant Design, Bootstrap 5, Styled Components, Storybook, Figma Handoff, Data Visualization (ApexCharts), Mobile-First Responsive Design, PWA, Flutter (iOS and Android), React Native, WCAG 2.1, ARIA, Semantic HTML, i18n

Testing & Quality: Jest, Vitest, React Testing Library, Playwright, Cypress, xUnit, NUnit, Test-Driven Development (TDD), Automated Testing (Unit Testing, Integration Testing, End-to-End / E2E Testing), Code Review, Debugging and Production Troubleshooting, ESLint, Prettier

Ways of Working: Agile / Scrum (Sprint Planning, Estimation), End-to-End Feature Ownership, Code Review, Mentoring, Technical Documentation, Engineering Standards and Best Practices, QA Collaboration, Cross-Functional Teams (Product Owners, Design, QA), Written and Verbal Communication, Technical Communication with Non-Technical Stakeholders, Remote (US, UK, Germany)

AI & LLM Engineering: Generative AI, Agentic AI, AI Agents, Large Language Models (LLMs), Microsoft Foundry (Azure AI Foundry), Foundry Agent Service, Azure OpenAI (GPT) Integration, Azure AI Search, Azure AI Document Intelligence, Azure AI Vision, Azure AI Content Safety, Responsible AI & AI Governance, Semantic Kernel, LangGraph, Agentic Workflows, Agent & LLM Orchestration, Tool and Function Calling (OpenAI, Anthropic Claude), MCP, RAG, LangChain, Vector Databases, RLHF, LoRA, PEFT, Prompt Engineering, LLM Evaluation Frameworks, Human-in-the-Loop, Streaming Responses (SSE), Vercel AI SDK, AI-Assisted Development (Claude Code, GitHub Copilot, Cursor)

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer, Supreme Committee for Delivery & Legacy

Oct 2025 - Aug 2026

Doha, Qatar | Hybrid, Full-Time

- Owned features end to end across Qatar's flagship government event platforms (the Qatar Events Platform, Road to Qatar, and the Hayya eVisa platform), serving 10+ government entities and supporting post-FIFA World Cup digital infrastructure.
- Rearchitected a monolithic React frontend into Micro Frontends using Module Federation, defining versioned contracts between the shell and remotes, cutting release cycle time by approximately 40% and enabling teams to deploy independently.
- Developed .NET backend APIs, SQL Server data access with T-SQL stored procedures, and Azure OpenAI (GPT) integrations across API and data contracts, authentication flows, and performance-critical endpoints for all 3 national platforms.
- Achieved Core Web Vitals compliance through memoization, virtualization, lazy loading, and code splitting, improving LCP by approximately 35% and TTI by approximately 30% on core pages.
- Designed data-intensive dashboards and real-time event density heatmaps with ApexCharts, giving stakeholders across 10+ government entities nationwide visibility into event scheduling and preventing calendar conflicts.
- Standardized Vite and Webpack build pipelines, ran Azure DevOps and Jenkins CI/CD deployments, led code reviews, and mentored 7 junior developers alongside backend, product, and design teams.

Stack: React, TypeScript, Redux Toolkit, Module Federation, ApexCharts, C#, .NET, SQL Server, T-SQL, Azure OpenAI, Azure CI/CD

Senior Full-Stack Developer, Volopa Financial Services

Jun 2023 - Oct 2025

London, United Kingdom | Remote, Full-Time

- Shipped production features across a multi-currency payments, card management, and employee expense platform covering transfers, transaction tracking, and KYC for customers in 180+ countries, with a React and Ant Design frontend over PHP and Node.js backend services, meeting WCAG 2.1 accessibility and UK fintech regulatory standards.
- Optimized large-scale data tables with react-window virtualization and memoization, reducing render time by approximately 70% on datasets exceeding 20,000 rows.
- Introduced dynamic code splitting that cut initial bundle size by approximately 35%, directly improving First Contentful Paint on financial dashboards.

- Refactored a legacy codebase into a modular architecture with a reusable component library, reducing feature development time by approximately 25%.

Stack: React, TypeScript, Redux Toolkit, Zustand, Ant Design, Tailwind CSS, react-window, Node.js, PHP, REST APIs, Agile/Scrum

Freelance Full-Stack Developer, Benington Financials Canada — Feb 2023 - Sep 2025

Canada | Remote, Part-Time Independent Contract

- Independently migrated 42 financial workflows from a legacy Visual FoxPro system carrying two decades of business logic to C#/.NET Core, delivering Angular and Blazor frontend features as the sole engineer responsible for end-to-end development.
- Redesigned legacy data models and business logic with no existing specification into a maintainable .NET Core domain layer on Entity Framework Core and 42 T-SQL stored procedures against SQL Server, with a testable data access layer, preserving all 42 financial workflows.
- Replaced the legacy Visual FoxPro reports with reporting workflows in the new Blazor application, retiring the old system over a 2.5-year engagement.

Stack: C#, .NET Core, Angular, Blazor, Entity Framework Core, SQL Server, T-SQL, Stored Procedures

Mid-Level Full-Stack Developer, Primary Target GmbH — Dec 2021 - Jun 2023

Bavaria, Germany | Remote, Full-Time

- Maintained React, Angular, and TypeScript interfaces for Codex, a cybersecurity platform assessing attack surfaces across 60M+ lines of vehicle software.
- Engineered real-time threat detection dashboards in React and TypeScript with WebSocket feeds, reducing analyst time-to-insight by approximately 20%.
- Created a C#/.NET Core module using Blazor Server and Entity Framework Core, applying Domain-Driven Design and CQRS patterns for admin and reporting workflows.
- Developed an internal custom hooks library and component system that standardized patterns across the team, improving delivery velocity by approximately 30%.
- Secured sensitive security data with 4-tier Role-Based Access Control, secure .NET API integrations, and data redaction pipelines filtered by caller tier.

Stack: React, Redux, Angular, TypeScript, C#, .NET Core, Blazor Server, EF Core, DDD, CQRS, Material UI, WebSockets, GitLab CI/CD, RBAC

JavaScript / TypeScript Developer, Turing Enterprises Inc. — May 2020 - Dec 2021

Palo Alto, United States | Remote, Full-Time (US business hours from Pakistan)

- Built full-stack LLM evaluation and training interfaces and dashboards used by 100,000+ people, with React, Angular, TypeScript, and Node.js, supporting human feedback (RLHF) and data-labeling workflows and integrating with backend research APIs.
- Deployed application components on AWS EC2, S3, and Lambda with Docker.

Stack: React, Redux, Angular, TypeScript, Node.js, Python, PostgreSQL, Redis, AWS (EC2, S3, Lambda), Docker

Frontend Developer, TechSurge Inc — Sep 2018 - May 2020

Karachi, Pakistan | Onsite, Full-Time

- Created responsive, cross-browser applications with React, Angular, JavaScript, and Redux, including reusable UI component libraries adopted across 2 internal projects.
- Promoted from Junior to Frontend Developer within 6 months; integrated .NET APIs and helped establish frontend coding standards.

Stack: React, Angular, JavaScript, Redux, HTML5, CSS3, .NET, REST APIs

PROJECTS

Hayya Qatar eVisa & Event Access Platform (hayya.qa) - Qatar's official eVisa and event access platform under the Supreme Committee, handling international visitor entry, accommodation, and event management since the FIFA World Cup 2022.
Next.js, React, TypeScript, Redux, Node.js, Tailwind CSS

Qatar Events Platform (QEP) (qep.sc.qa) - Unified hub for planning and coordinating Qatar's National Events Calendar, connecting government entities and preventing scheduling overlaps nationwide.
React, TypeScript, Redux Toolkit, Micro Frontends (Module Federation), React Router, .NET

Road to Qatar - Supreme Committee fan platform with interactive challenges, fantasy football, match predictions, and global leaderboards.
React, TypeScript, Redux Toolkit, REST APIs, .NET

Norstella Pharma Solutions Platform (norstella.com) - Web platform for Norstella, a group of pharmaceutical solutions providers.
React, Angular, JavaScript, Bootstrap, Zustand, Server-Side Rendering (SSR)

Eclipse AI (eclipse-ai.com) - Generative AI voice-of-customer analytics platform; worked on the React frontend with Redux Toolkit (2023).
React, Redux Toolkit

EDUCATION

Bachelor of Science (BS) in Computer Science, Iqra University, Karachi, Pakistan, GPA 3.60/4.00 — Feb 2014 - May 2018

Level 5 Extended Diploma in Business Management, Qualifi Ltd., London, United Kingdom — May 2023 - Apr 2025

CERTIFICATIONS

Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) — Oct 2026
Issued by Microsoft, Oct 2026; successor to AI-102 (Azure AI Engineer Associate, retired Jun 2026). Validates: Microsoft Foundry, Azure OpenAI, agents with function calling and multi-agent orchestration, RAG with Azure AI Search, Azure AI Content Safety, Azure AI Vision, Azure AI Document Intelligence, Azure AI Language and Speech.

Cisco: Optimizing Generative AI — Oct 2026
Cisco: Prompt Like an Engineer — Oct 2026
Cisco: Introduction to Modern AI — Sep 2026
Cisco: Python Essentials 1 — Sep 2026
Cisco: JavaScript Essentials 1 — Sep 2026
Certified Cybersecurity Educator Professional (CCEP) — Dec 2025
HP LIFE: Data Science & Analytics — Nov 2025
